Security Advisor

How our expert site assessments help uncover not just your security gaps, but also the solutions that can future-proof your business and protect what matters most

Identify your security gaps and unlock the right solutions with our assessment

Today, businesses—whether large organizations with multiple sites or individual enterprises—face growing challenges in identifying and managing security needs in a structured manner. Our trained security experts use Advisor, our professional site assessment tool, to conduct structured, on-site evaluations of your locations.

You receive a data-driven and actionable overview of your specific security gaps, enabling you to make informed decisions for your security.

How Advisor supports your security planning

CLARITY ON YOUR CURRENT SECURITY SITUATION

You receive a precise assessment report of your security needs for your location(s) to streamline your decision-making process.

STRUCTURED AND PROFESSIONAL ASSESSMENT

We guide you through an in-depth evaluation of your security setup (based on ISO 31000 principles).

COMPARABILITY ACROSS MULTIPLE LOCATIONS

Whether head office or branch, you can see directly where there are differences and where you are on the right track.

COLLABORATION ACROSS SITES

Our experts work efficiently across sites to ensure you receive your report in the shortest time possible.

PROFESSIONAL REPORTS FOR YOUR RECORDS

Receive a report with full site assessments and recommendations for actions — clear and to the point.

PROVEN EFFECTIVENESS

With a track record of successful site assessments, we create comprehensive solutions tailored to your specific security needs.
